

Revenue mix is shifting toward product growth.

Services still stabilize the base, but product revenue now creates most of the quarter-over-quarter lift.

+55%

Product revenue growth from Q1 to Q4

Quarterly revenue by segment, USD millions

Activation bends upward after onboarding changes.

64%

June activation rate after the new setup flow

- April release simplified first-run setup.
- Two-month lift is visible without axis truncation.
- Animation is disabled for deterministic export.

CHART.JS / DOUGHNUT

Enterprise now carries the largest ARR share.

The portfolio moved upmarket without losing the mid-market base, changing how sales capacity should be allocated.
